

Bleed Area: Unimportant backgrounds should extend to the **red line** to allow for variations in where the actual cut line lands.

Cut Line: The **black line** is the approximate edge of the air freshener.

Text and Image Safe Area: Keep all important images and text within this **green line** to ensure they don't get cut off.

We support JPG, PDF, AI, EPS, PNG, HEIC, SVG, and more.

See all supported formats.

For best quality, use vector files (such as ai, pdf, eps, svg). If you're using raster (png, jpg, etc) image quality needs to be at least 300 pixel per inch.

Ensure the font size is at least 10 for optimal readability; we cannot be held responsible for clarity with smaller sizes.

AVOID CONTACT WITH PAINTED, PLASTIC, OR VARNISHED SURFACES
